The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase “each bracket” and “the attachment bracket”, as set forth in claim 1, lacks antecedent basis.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 2 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Nowdworski. Nowdworski shows base unit 1-4, scaffold engaging unit with a plurality of legs 17-5; 17-6; 17-7; 17-8; attached together in pairs, scaffold engaging bars 10 and stabilizing unit 22 with turnbuckle element 21.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nowdworski in view of Scallan. Nowdworski shows the claimed support with the exception of a stabilizer unit with a turnbuckle. Scallan shows a stabilizing unit at 63,64 with a turnbuckle. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Nowdworski to comprise a stabilizing unit, as taught by Scallan, for stabilizing his support.

Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.
